SUMMARY

Hardworking and ambitious, I thrive on solving problems using technology, particularly within teams where collaboration fosters skill improvement.

Currently pursuing a position as a full-stack/front-end/back-end web developer in the industry, with the next goal of transitioning into a DevOps engineer.

Studying Computer Systems Analysis and enrolled in the Associate Cloud Engineer course at Google to enhance my systems and cloud engineering foundations.

Continuous improvement is my motto.

EXPERIENCE

- **March 2022 – October 2023**
  Full Stack Developer at Vizo
  Fashioned complex web applications with big code bases and dozens of pages and systems, such as medical forms, sports marketing, and social media interactions.
  My most valuable experience yet. As a full-stack developer in a small team, I learned about leadership and teamwork, managing my time, and handling multiple tasks.

- **January 2021 – March 2022**
  Freelancer Software Developer
  Integrated existing systems into new web apps and built brand-new systems. Scenarios ranged from Discord™ bots with browser integration, landing pages, and control panels for Crypto startups.

- **February 2012 – November 2012**
  Freelancer Web Developer
  Built fast and static landing pages for small local businesses in my neighborhood, using HTML, CSS, and JavaScript. It was a learning phase that taught how to manage clients and deadlines.

EDUCATION

- **January 2023 – Current**
  Computer Systems Analysis Bachelor at FATEC (São Paulo, SP, Brazil)
  Attending my first year. A solid foundation in data structures, algorithms, and business analysis is invaluable to improving my skills repertoire. And the diploma is a nice bonus.

- **January 2014 – December 2016**
  Mechatronics Technologist at Centro Paula Souza (São Paulo, SP, Brazil)
  This course doubles as my high school diploma. It was an integrated three-year technologist course. Apart from technical skills, planning and problem-solving were the most valuable things taken rom there.

COURSES

- **April 2022 – Current**
  Associate Google Cloud Enginner at CloudSkillsBoost
  This introductory and foundation-building course teaches the workflow and primary services that the Google Cloud Platform provides. It's the first step into acquiring the GCP Engineer certification.

- **January 2011 – December 2011**
  Web Design Course at SESC SENAI (Jacarepaguá, RJ, Brazil)
  It was a 200-hour Web Design course that, at the time, brought back the web environment to my attention, and was the foundation that leveraged my developer career pursuit in the following years.

- **Lifetime**
  Udemy Courses at Udemy
  Complete Vue Developer;
  Linux Operating system;
  Introduction to PHP;
  Introduction to MySQL & PHPMyAdmin.

IDIOMS

- Portuguese – Native
- **English – Fluent**
- Spanish – Basic
- Japanese (日本語) – Basic

MAIN SKILLS

- HTML – 6 years
- CSS – 6 years
- JavaScript – 6 years
- **TypeScript – 3 years**
- **NodeJS – 3 years**
- **Vue – 3 years**
- **Nuxt – 3 years**
- Vite – 3 years
- Tailwind – 3 years
- Docker – 3 years
- **Google Cloud Platform – 3 years**
- MongoDB – 3 years
- Firebase – 3 years

EXTRA SKILLS

- C# – 1 year
- SQL – 1 year
- Angular – 1 year
- Svelte – less than 1 year
- SvelteKit – less than 1 year
- PHP – less than 1 year
- ASP.NET – less than 1 year
